Specifications
- Validations: BHS (A/A), ESH, ANS/AAMI SP10:2002
- BP Technique: Oscillometry with step deflation
- BP Range: 25-260 mmHg
- HR Range: 40-200 bpm
- Sampling Periods: 3 adjustable (awake, asleep, and special)
- Time Intervals: 5, 10, 15, 20, 30, 45, 60, 90 and 120 min.
- Event Key: Program to allow additional patient readings
- Data Storage: Flash memory stores up to 250 readings
- Power Source: Two AA batteries
- Weight: 284 grams, including batteries
- Dimensions: 12 x 7 x 3 cm
- PC Requirements: Serial or USB port, Windows® 98 or later

Distributor Information

Oscar 2™ System
Providing accurate and reliable blood pressure measurements night and day.
The New Standard in Ambulatory Blood Pressure Monitoring (ABPM)

Considered the gold standard for measuring blood pressure by experts worldwide, ABPM provides valuable information on BP variability, overnight dipping and morning surge that in-clinic and home BP monitoring does not.

The Oscar 2™ system from SunTech is a reliable and cost-effective solution for ABPM.

Trusted Accuracy and Reliability
The Oscar 2™ is the only ABPM available that is clinically validated to all three internationally recognized standards.*
- BHS (A/A)
- ESH International Protocol
- AAMI SP10

Simple Set-up and Operation
- User-friendly programming with AccuWin Pro™ v3 for Windows®
- Quick patient application with no electrodes or microphones needed
- Three adjustable measurement periods for individual patient studies

Designed for Patient Comfort and Compliance
- Light and compact design
- Proprietary motion-tolerant algorithm reduces re-inflates and failed readings
- Auto-intelligent inflation pressure reduces measurement time
- Quiet pump operation

Orbit™ Blood Pressure Cuffs
The Oscar 2™ system includes the first and only cuff designed specifically for ABPM, improving patient compliance and ensuring better results.
- Patented, stretch-shweve design maintains appropriate placement
- Easy self-application without the discomfort of a D-Ring
- Curved design for proper fit on larger arm sizes
- Removable bladder for machine washing
- Colour coded range and size indications

Powerful AccuWin Pro™ v3 Software
AccuWin Pro™ v3 is a user-friendly, Windows® based program that allows maximum flexibility for configuration, analysis, interpretation and reporting of ABPM studies.
- Interpretative summary for quick review
  An automated analysis of ABP levels for normality, white coat syndrome and overnight dipper status according to AHA, ESH or JNC 7 published guidelines.*
- Single page and custom report options
  A simple one page report includes an ABP graph, interpretive summary, asleep dip analysis and statistics with selected patient information.

AMBULATORY BLOOD PRESSURE REPORT

Phone: 123-555-9876  Fax: 123-555-9877
Email: cardiolab@university.edu

Dr. Paul Green
001-00-0000 26-Aug-2005

Interpreting physician:

*AHA • BHS • ESH • American Heart Association • BHS • British Hypertension Society • ESH • Association for the Advancement of Medical Instrumentation • ESH • European Society of Hypertension

**JNC 7 • The Seventh Report of Joint National Committee on Prevention, Detection, Evaluation and Treatment of High Blood Pressure

Clear presentation of statistical results
Statistics are provided for awake, asleep and overall periods including average blood pressure, heart rate, pulse pressure, mean arterial pressure and BP load.

Study comparison shows patient progress
Make better treatment decisions by comparing follow-up studies.

PDF report for electronic medical records
Create an un-editable, electronic report for storage in most electronic medical record systems.

Export of collected data
Allows sharing of raw data with other statistical or spreadsheet applications.

Built-in E-mail capability
Email a patient study to other AccuWin Pro™ v3 users.
